FINANCIAL.

No activity, no incidents, was the report a Madison street yesterday. Rates for money at the Memphis banks 86e 10 per cent. per annum, on the street 106e 12 per cent. lates of exchange remain steady at New York, and eastern demand par buying, 14 premium selling: New Orleans 14 discount, selling at par. The New York Bulletin, of Saturday, reported: "New York exchange was quoted to-day as follows at the places named Savannah, baying 3-16, selling 5-16; Charleston easier, offering freely, 3 16@1-5 premium, 34 premium; St. Louis, 1-10 premium; Cincinnati steady, boying par, selling 1-10; New Orleans, commercial 4, bank 36; Chicago, 50 to 75 premium. Gold was taken by the brokers at 106. The Bulletin says: by the brokers at 106. The Bulletin says:
"Naturally it was expected that the shipment
of gold to-morrow would be large, and it
would have been except for the sale yesterday afternoon to those who would have
shipped gold coin to-day of a large amount
(not far from £175,000) of demand sterling at a point which made it a better remittance than gold coin. These demand bills were drawn by the Nevada bank, of San Francisco, and were indersed by the Bank of New York, making about as good a bill as could be drawn. It is understood that the bills were against silver bullion. As it is there will be some gold shipped to-morrow, and large exports may be expected for the next six to ten- weeks, these being estimated at not less than \$15,000,000. The advance in consols to 9436 @ 9436 in London, it is to be said, had a depressing effect on The St. Louis Republican remarks: "Gold has very firmly maintained its footing at 107 to 107 and a fraction, and if reports from the seat of war are to be trusted, there are occurrences brewing which will afford the bulls very good grounds far another toss up of the premium. The occasion would be the interference of England in the fight. The moment any act of England makes her participation in the war a certainly there will be a panic in securities, and this will send up gold for the time being. For it is believed that if England goes in, all the other European nations will, one by one, be compelled to take sides, and such an event would cause millions upon millions of securities to come upon the market, and the gold obtained by their sale to be hoarded away." The home market for stocks and bonds reported nothing

COTTON. The cotton market was again without Liverpool-telegrams yesterday, but in their absence the tenor of the market is upward, the telegrams from United States markets show a decidedly stronger tone. In our market the inquiry was good, and cotton was more accessible, about sixteen hundred bales being on the table that was hitherto out of sight. Exporters bought freely, and a day's good business was done. Holders were staff at quotation rates; ordinary and good ordinary eing in active demand were especially trong. The market closed firm and active. The New York Bulletin, of Saturday, says: "For future delivery there has been a somewhat higher market, and during the greater portion of the day appearances were com-paratively firm. The demand, however, was not very active or general, and no one appeared to have faith for tree investment, while toward the close the extremes were while toward the close the extremes were 24-pound, 12@1234c; baling twine, 13@14c; while toward the close the extremes were modified under an increased effering and a slight pressure to realize. Liverpool quoted firmer, a few more buyers for export on the market and the absence of any organized resistance gave the 'bulls' their confidence for the time being, but but the first of full or resumanent advance was not seen as a superposition of the confidence for the time being. belief in a full or permanent advance was not entertained. The advices from the south generally are favorable for the crops, and this another influence calculated to offset buoy-ncy." The cotton manufactories of the world run a total of 65,000,000 cotton-spindies, and spin 2,676,000,000 pounds of cotton annually. Of the spindles, 35,000,000, or more than one-half are operated in England. But other nations are rapidly gaining upon England, especially is America, and if the resent European war entangles England and ther nations in the strife, it is quite likely the United States will rise to the first place in cotton manufacturing before the close of the next decade. Inventions of better machinery for manufacturing cotton and other good seds rapidly in this country, and by the time the European complications are settled, it is likely the old machinery of England would be too much behind the age to com-pete with the new style of American machines. Cotton factories have been doing pretty well of late. The Sagamore mills, of Fall River, have earned 22 per cent upon
